HOP UP	Adjustable
MAGAZINE	28 rds
PELLET TYPE	6 mm BB
INITIAL SPEED (Normal)	278~311 fps

The Trinity Hi-Capa is a new airsoft pistol that Modify-Tech is developing. Airsoft fans can count on its 3 main characteristics— accuracy, high modifiability, and mid-price point.

Notable features:

1. Patented slide release enables precise adjustment of hop-up without disassembling upper and lower body.
2. Hi-sensitivity trigger shortens trigger travel.
3. Steel firing mechanism including hammer, seal and separation switch for much improved durability.
4. Ambidextrous stainless-steel thumb safety for user-friendliness by right- or left-handers.
5. Hardened anodized aluminum 6.03mm inner barrel with the latest Accurate bucking for improved airtightness, range and precision.
6. Muzzle with 11mm CW for mounting silencer, LED light etc.
7. Nylon fiber grip for toughness and durability.
8. Optional nylon fiber or aluminum alloy slide to suit particular market.
9. Modified to easily accept Marui spec accessories.

ACCESSORIES

MAGAZINE FOR Hi-Capa

Magazine for TM, AW, WE, KJW, Army Armory series Hi-Capa pistols.
