OTs-126
Gas Blowback Rifle

Based on the classic Russian OЦ-126, the OTs-126 is a transform version that shares the same platform as the PP-2K.

OTs-126(原文: -126)是一把俄羅斯的民用卡賓槍，為經典俄羅斯衝鋒槍PP-2000的衍生民用款式。

Features

- **Safety, semi-auto, and full-auto firing modes**
具保險、半自動及全自動三種射擊模式
- **460mm inner barrel and X-range bucking out of the box**
460mm鋁合金精密內管搭配 X-range Hop皮
- **Extra tough inner parts handle both CO2/Gas magazines**
鋼製的板機結構可以同時使用CO2及瓦斯彈匣
- **Full travel bolt for lifelike recoil**
射擊時的全行程運作提高後座力及仿真度
- **CNC aluminum OTs-126 conversion kit**
CNC鋁合金製的OTs-126上槍身
- **CNC aluminum Picatinny rail for universal optical mounts**
CNC鋁合金製的皮卡丁尼軌道
- **Switch from OTs-126 to PP-2K only needs 10 seconds**
從OTs-126切換到PP-2K不用10秒
- **M4 style metal buffer tube**
通規M4後托的後托連接管

► **Contents** OTs-126 x1, 22 rounds gas short magazine x1

[OTs-126]
How-To

OTs-126 with GAS 22rds magazine : 65302-61
PP-2K with GAS 22 rds magazine + OTs-126 Kit : 65302-51
OTs-126 Conversion Kit : 65302760

Propellant Type / 彈匣氣體類型		OTs-126 Gas version / 瓦斯版本
Weight (without mag) / 重量 (不含彈匣)		2 kg
Length / 長度		630 mm
Inner Barrel Length / 內管長度		460 mm
Inner Barrel Diameter / 內管管徑		6.03 mm
Hop-up		TDC adjustment
Magazine Capacity / 彈匣容量		22 rds
Caliber 彈藥種類		6 mm BB
Velocity 槍口初速	High / 高速	440 fps (135 m/s)
	Normal / 一般	380 fps (115 m/s)
	Low / 低速	295 fps (90 m/s)
Muzzle energy output with 0.2g BB for Japan CO2 version is under 0.98 Joule. 日本CO2版在使用0.2g BB彈情況下，槍口動能小於0.98焦耳。		
Operating Temperature / 建議操作溫度		20~25°C 68~77°F

Bigger & Better

The OTs-126 is overall bigger than the PP-2K in both exterior and internal parts, with the 150mm inner barrel lengthened to 460mm for greatly improved stability and muzzle velocity.

Full-on Tactical

The Picatinny rail consists of the new handguard and a top scope rail to meet all your full-on tactical gear requirements. Not that you have to but you can.

M4 Buffer Tube

The new M4 buttstock buffer tube is compatible with most M4 buttstocks available on the market to guarantee a personalized, ergonomic shooting position.

Switch & Go

The most appealing feature of the OTs-126 is its amazingly easy, practical assembly, with the lower body being fully compatible with the PP-2K, so switching takes less than 10 seconds for long-range Milsim event or CQB gameplay.

Feature Overview

Reinforced Body

The PP-2K stock is made of nylon fiber, which is similar to the real PP-2000 to be tough and durable. Any normal field battle can't break it.

Steel Trigger Unit

Almost all the internal parts in the trigger housing are made of steel, with about 60% of the whole gun also made of steel. Rest assured that the solid build quality stands up to the roughest gameplay.

TDC MOD

The TDC hop up system allows you to easily adjust the trajectory of BBs based on the weight of the BBs and your personal preference.

X-range Bucking

With factory-equipped X-range Bucking, 460mm inner barrel, and heavy BBs, you can shoot farther than most AEGs or even sniper rifles among your local airsoft field.

Both CO2 & Gas

PP-2K is also versatile to handle both CO2 and Gas in one frame, which gives players more freedom to choose. You will not be limited.

Accessories Pack

PP-2K

Gas Blowback SMG

[PP-2K]
How-To

以經典俄系槍款PP-2000為原型，摩帝將其以PP-2K的名稱重現於玩具槍上。

Based on the classic Russian PP-2000, the PP-2K has been revived on an airsoft submachine gun that is sure to be a rage among players favoring Russian guns.

Features

- **Safety, semi-auto, and full-auto firing modes**
具保險、半自動及全自動三種射擊模式
- **Enlarged window size design inner barrel + Predator Bucking(optional) = Shoots Far and Straight with heavy BBs**
150mm鋁合金硬隔內管 + 摩帝的Predator 猛禽HOP皮(選購)，搭配重彈進行遠距離射擊
- **Extra tough inner parts handle both CO2/Gas magazines**
鋼製的板機結構可以同時使用CO2及瓦斯彈匣
- **Full travel bolt for lifelike recoil**
射擊時的全行程運作提高後座力及仿真度
- **14mm-CCW threaded barrel for suppressors/tracer units**
槍口防火帽取下後可以安裝14螺牙的滅音管或發光器
- **CNC aluminum Picatinny rail for universal optical mounts**
CNC鋁合金製的皮卡丁尼軌道
- **Solid but lightweight as a perfect sidearm**
槍身採用與真槍相似的強化塑膠使它輕巧與堅固集一身
- **Sold with a hard gun case and an accessories pack**
隨槍附有一個硬殼塑膠槍箱及配件包

Become a Tacticool PP

Made for you

The PP-2K is ideal for players who like to run and gun. It's lightweight with heavy-duty firepower, perfect for fast-paced gameplay.

If you always dress up as a Russian operator but can't find any GBB except AKs, this is what you've been looking for. It's one to one scale to the real steel and made of solid materials including steel.

Full-Travel Bolt

While airsoft is always for fun. The PP-2K with the full-travel bolt system functions and recoils just like a real Russian PP-2000.

Double-duty Mag

Ture to every detail, the PP-2K has a folding stock that can be removed to insert a short (standard) or long (optional) magazine which becomes a spare and a stock. Just like the real Russian PP-2000.

Switch & Go

The most appealing feature of the PP-2K is its amazingly easy, practical assembly, with the lower body being fully compatible with the OTs-126, so switching takes less than 10 seconds for CQB gameplay or long-range Milsim events.

Feature Overview

Easy & Reliable

We all know that Russian firearms are renowned for their easy use and incredibly reliable. So we build such advantages into the PP-2K. Disassemble the upper and lower just by pushing one button as you would with the real PP-2000.

Reinforced Body

The PP-2K stock is made of nylon fiber, which is similar to the real PP-2000 to be tough and durable. Any normal field battle can't break it.

Steel Trigger Unit

Almost all the internal parts in the trigger housing are made of steel, with about 60% of the whole gun also made of steel. Rest assured that the solid build quality stands up to the roughest gameplay.

TDC MOD

The TDC hop up system allows you to easily adjust the trajectory of BBs based on the weight of the BBs and your personal preference.

Predator Bucking

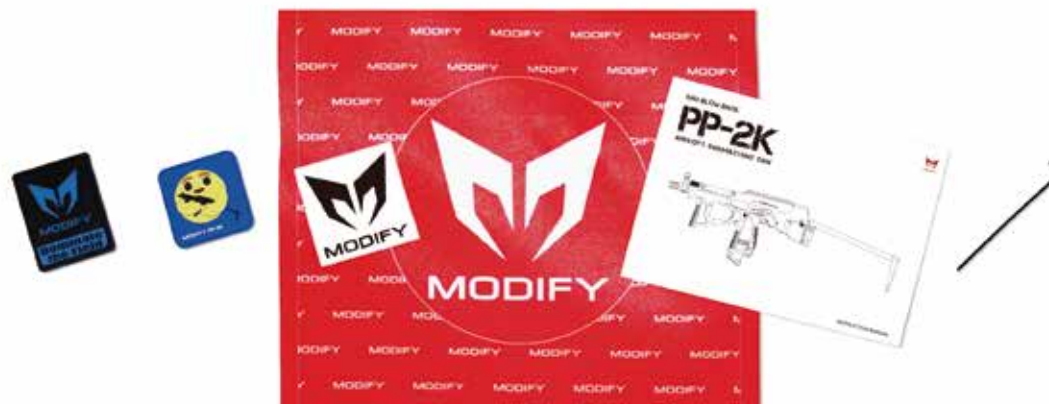

The stock PP-2K comes with the Modify Tan hop up bucking which is known for consistency and cold resistance. This newest Predator hop up bucking (optional) has been designed with our ample experience so players can shoot even heavy (0.4g) BBs farther than rivals.

Both CO2 & Gas

PP-2K is also versatile to handle both CO2 and Gas in one frame, which gives players more freedom to choose. You will not be limited.

原廠搭配Predator 60度 猛禽Hop皮
- **Airbrake piston out of the box**
具空氣煞車功能的静音活塞組
- **Enlarged cylinder set with over 12.5% bigger volume than MOD24**
加大版汽缸組較MOD24多12.5%的氣量
- **100% Airtight**
100%氣密
- **Translucent magazine for BBs checking**
半透明32發彈匣方便檢查剩餘彈量
- **Extra storage for tools and a spare magazine**
裝飾彈匣可用於存放工具及一個備用彈匣

出名自知名電玩Counter-Strike絕對武力, 這把被稱作輕狙、鳥狙的Steyr Scout肯定在當時帶給許多玩家滿滿的回憶。摩帝希望這把具有真槍廠授權刻字的Steyr Scout能讓玩家們找回過去的感動。

Famous for the well-known video game Counter-Strike, this Steyr Scout is the emotion-stirring airsoft replica that has been part of many of you growing up.

With authorization from the real gun maker Steyr Arms and licensed by ASG, we're bringing an upgraded gun so you may relive your fond memories.

Realistic

The first authorized manufacture of a sniper rifle, the Scout is lifelike with all the markings and 8 different patterns on the stock being faithfully duplicated and certified by one of the biggest licensing companies, ASG.

Integrated Bipod

Just like the real Scout, ours has the integrated bipod that is easily actuated by pressing the button on the lower side.

Why Not Both

Our Scout satisfies airsoft players' demand for convenience and accuracy when adjusting the hop up for trajectory, giving players both adjustment lever and TDC mod out-of-the-box.

100% Airtight

Each and every Scout made by Modify Tech is 100% airtight, having been tested by our specially-made instrument.

Extra Space

The dual cosmetic magazines on the Scout's stock actually are functional, being extra storage for small tools and a spare magazine.

Predator Bucking

The Scout comes standard with the newest Predator bucking, which is the result of our extensive R&D to enable players to shoot farther than rivals even with heavy 0.48g BBs.

Airbrake Piston

Despite the success and popularity achieved with our first sniper rifle MOD24, we listened to our users who suggested that the airbrake piston, newly designed with new materials, be also installed in the Scout, giving players not only accuracy but also stealth.

Enlarged Cylinder

Compared to that on the MOD24, the Scout has a steel cylinder 12.5% bigger, enabling players improved muzzle velocity and stability.

Translucent Mag

As before the Scout comes with a translucent, enlarged magazine that not only enables smooth loading but also viewing of BBs remaining, as well as being compatible on the MOD24.

Nylon Fiber Body

With a nylon fiber body, the Scout feels like the real gun offering players unsurpassed realism and improved structural strength.

What's Included
